**Subject: Letter Report  
Miller Metal Site  
Atlanta, Fulton County, Georgia  
Technical Direction Document No. TNA-05-003-0007**

Dear Ms. Callihan:

The T N & Associates, Inc. (TN&A) Superfund Technical Assessment and Response Team (START) has prepared this Letter Report in accordance with the requirements of U.S. Environmental Protection Agency (EPA) Technical Direction Document (TDD) No. TNA-05-003-0007. The scope of this TDD was to conduct a Preliminary Site Assessment (PSA) at the Miller Metal site in Atlanta, Fulton County, Georgia. Specifically, TN&A was tasked to review historical evidence of the site including Sanborn® maps, city directories, and other sources. TN&A conducted library and internet research and performed a site reconnaissance to further determine the site history.

This Letter Report summarizes TN&A's findings of Miller Metal, including site locations and operational history. Enclosure 1 presents the Atlanta City Phone Directories (1937-1953), Enclosure 2 presents significant Sanborn® maps, and Enclosure 3 presents the photographic log of the site reconnaissance.

#### **Site Description**

According to the 1938 Atlanta City Phone Directory, the address of Miller Metal was listed at 141 Fort Street SE in Atlanta, Georgia. In the 1941 Atlanta City Phone Directory, Miller Metal was listed at 73-75 Mills Street NW in Atlanta, Georgia. As of 1953, Miller Metal was no longer listed in the Atlanta City

Phone Directories. Based on available information, it is assumed that Miller Metal operated for 14 years from 1938 until 1952. Additionally, it is believed that Miller Metal only operated approximately 3 years, from 1938 through 1940, at the 141 Fort Street SE location, and operated the remaining 11 years, from 1941 through 1952, at the Mills Street NW location. Enclosure 1 provides the Atlanta City Phone Directories from 1937 until 1953, where Miller Metal was no longer listed.

The Atlanta City Phone Directories listed Miller Metal as a metals smelter and manufacturer. All types of solder and babbitt were sold to consumers (see Enclosure 1). Soft solders (usually alloys of tin and lead, sometimes with added antimony) are widely used in the electrical industry for joining copper wires. Hard (or brazing) solders, such as silver solder (an alloy of copper, silver, and zinc), form a much stronger joint. Babbitt is a soft, white metal, an alloy of tin, lead, copper, and antimony, which is used to reduce friction in bearings.

TN&A gathered historical evidence on Miller Metal by obtaining Sanborn® maps from Environmental Data Resources, Inc. (EDR) (see Enclosure 2). After extensive review of the Sanborn® maps, the address at 141 Fort Street SE was identified on a 1931 map. Although the map did not clearly identify smelting structures, one building was present at the address. After reviewing a 1950 Sanborn® map, 141 Fort Street SE no longer existed. In 1950, the property was occupied by Grady Homes, apartment-like housing units. Grady Homes was bordered to the north by Tanner Street SE, to the west by Bell Street SE, to the east by Hilliard Street SE, and to the south by Decatur Street SE. Fort Street SE formerly ran through the middle of the property, running north to south.

In addition, TN&A gathered Sanborn® maps of the Miller Metal address at 73-75 Mills Street NW. In the 1950 map, a building marked "Metals Melting" was located on the property. In the 1978 map, the property was occupied by an auto storage facility and an office building. The expanding interstate system was also present in the 1978 Sanborn® map.

After conducting an internet search of the Miller Metal address at 73-75 Mills Street NW, the property is currently part of the Interstate 75/85 through Downtown Atlanta. Based on the location of the property in the 1950 and 1978 Sanborn® maps, the area of the former smelter is now contained by the Williams Street exit from Interstate 75/85. Because the construction of an interstate is an intrusive process requiring excavation and manipulation of soils, it is unlikely that native soils from the smelting operation remain.

Additionally, the inability to differentiate lead deposited by a smelting operation versus lead deposited by leaded gasoline emissions prevents the collection of reliable data that could attribute the lead in soil to the former Miller Metal facility.

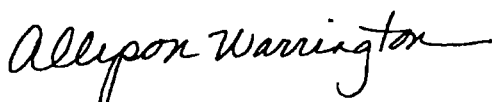

On October 6, 2006, TN&A conducted a site reconnaissance at the former 141 Fort Street SE address (see Enclosure 3). Digital photographs were taken throughout the visit. TN&A noted that Grady Homes no longer exists at the property. All structures have been demolished, hardwoods are surrounded by an orange economy snow fence, and the property is surrounded by a chain-link fence. The Atlanta Housing Authority currently owns the property.

### Summary

Miller Metal, formerly located at 141 Fort Street SE, is the primary area of concern due to its operational history as a smelter and the potential future use of the site. Upon review of records by the Atlanta Housing Authority, confirmation sampling may be necessary. This recommendation will be determined by EPA.

If you have any questions or comments regarding this Letter Report or require any additional information, please contact me at (678) 355-5550 ext. 5709.

Sincerely,

Allyson Warrington

TN&A START Site Assessment Coordinator

Site Name: Miller Metal

Previous Names (if any): N/A

Site Location: 141 Fort St. SE  
(Street)  
Atlanta GA  
(City) (ST) (Zip)

Latitude: \_\_\_\_\_ Longitude: \_\_\_\_\_

Complete the following checklist. If "yes" is marked, please explain below.

	YES	NO
1. Does the site already appear in CERCLIS?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
2. Is the release from products that are part of the structure of, and result in exposure within, residential buildings or businesses or community structures?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
3. Does the site consist of a release of a naturally occurring substance in its unaltered form, or altered solely through naturally occurring processes or phenomena, from a location where it is naturally found?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
4. Is the release into a public or private drinking water supply due to deterioration of the system through ordinary use?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
5. Is some other program actively involved with the site (i.e., another Federal, State, or Tribal program)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
6. Are the hazardous substances potentially released at the site regulated under a statutory exclusion (i.e., petroleum, natural gas, natural gas liquids, synthetic gas usable for fuel, normal application of fertilizer, release located in a workplace, naturally occurring, or regulated by the NRC, UMTRCA, or OSHA)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
7. Are the hazardous substances potentially released at the site excluded by policy considerations (e.g., deferral to RCRA Corrective Action)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
8. Is there sufficient documentation that clearly demonstrates that there is no potential for a release that could cause adverse environmental or human health impacts (e.g., comprehensive remedial investigation equivalent data showing no release above ARARs, completed removal action, documentation showing that no hazardous substance releases have occurred, EPA approved risk assessment completed)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Please explain all "yes" answer(s), attach additional sheets if necessary:

---

---

---

---

---

Site Determination:

☐ Enter the site into CERCLIS. Further assessment is recommended (explain below).

☒ The site is not recommended for placement into CERCLIS (explain below).

DECISION/DISCUSSION/RATIONALE:

According to Atlanta City Directories, Miller Metal formerly operated at 141 Fort St. SE in Atlanta, GA, then transferred its address to 73-75 Mills St. NW. Since sometime around 1950, the Fort St. site was occupied by apartment-like housing units (Grady Homes); however, these structures were recently demolished. The Atlanta Housing Authority currently owns the site. The Mills St. location no longer exists due to the expanding construction of Interstate 75/85 near William's St.

Due to the construction/demolition of housing units at the Fort St. site, it is unlikely that native soils from former smelting operations remain. In addition, because the construction of an interstate is an intrusive process requiring excavation and manipulation of soils, it is also unlikely that native soils remain at the former Mills St. location.

TN&A does not recommend placement of Miller Metal into CERCLIS.
